TIPOS DE WEB

WEB 1.0

WEB ESTATICA

La Web 1.0: fue la primera etapa de internet, caracterizada por ser una web estática de "solo lectura". Funcionaba como una biblioteca digital unidireccional donde los usuarios consumían información sin interactuar, ya que las páginas eran fijas, HTML básico y actualizadas manualmente por un webmaster, sin redes sociales.

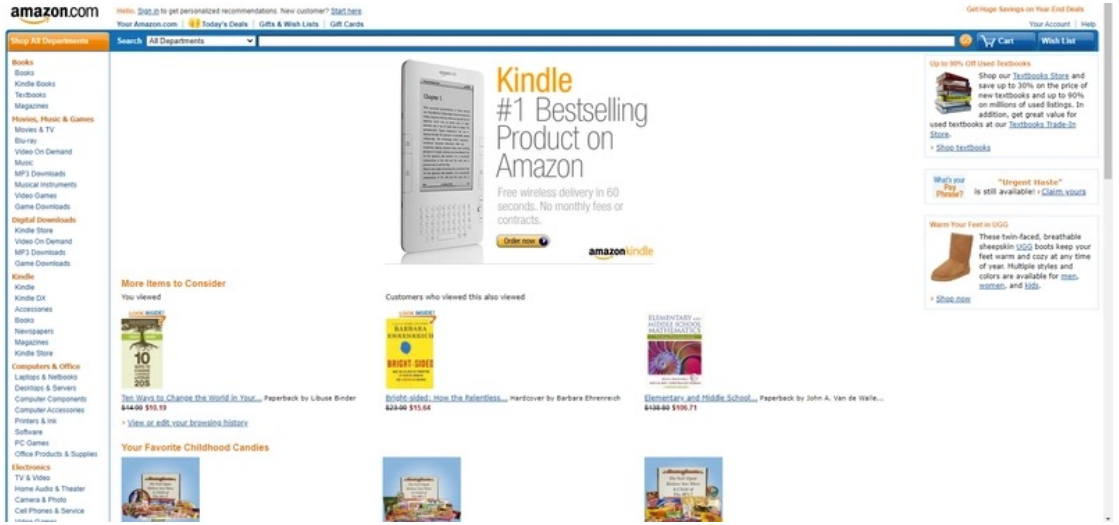

WEB 2.0

WEB DINAMICA

La Web 2.0, o web social, son sitios web dinámicos e interactivos donde el usuario deja de ser un consumidor pasivo y se convierte en creador de contenido. Se caracteriza por la colaboración, el intercambio de información, la facilidad de uso y la inteligencia colectiva, ejemplificada en redes sociales, wikis y blogs.

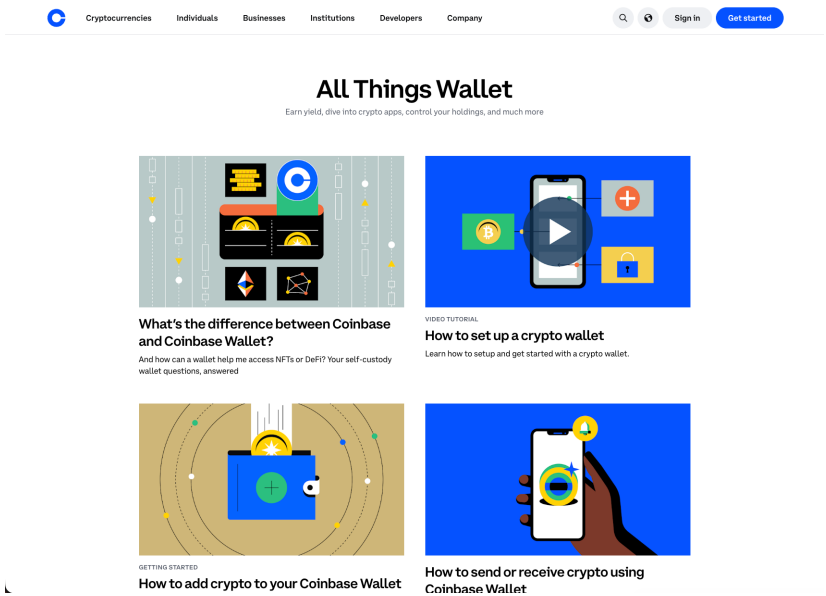

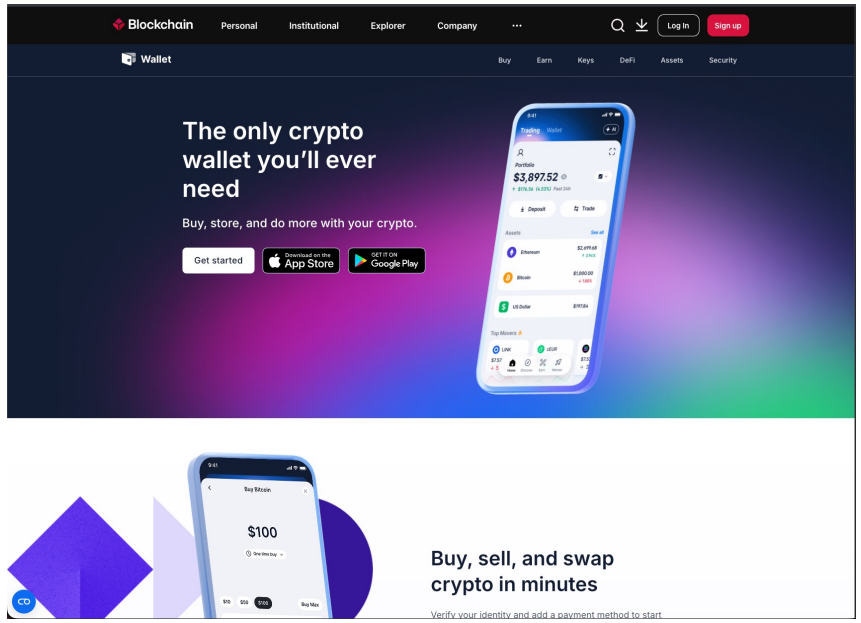

WEB 3.0

WEB SEMANTICA

La Web 3.0, o web semantica, es de las nuevas generaciones, la cual utiliza inteligencia artificial y decentralizacion, esta brinda mayor control al usuario sobre toda su informacion. Esta sobre blockchain, la cual no depende de una empresa unica.

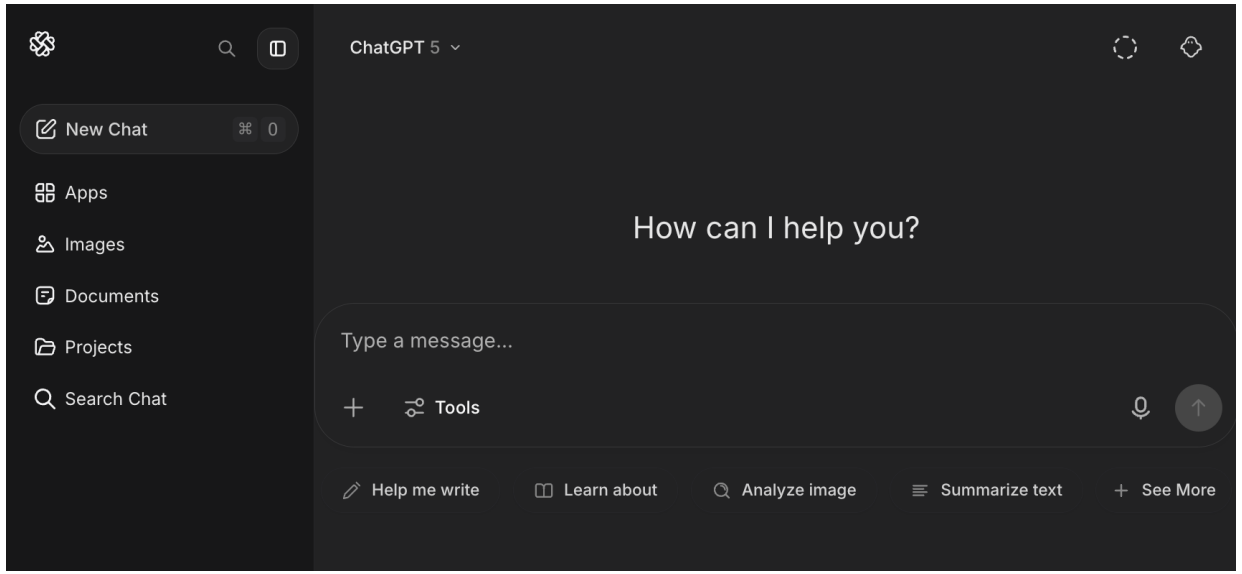

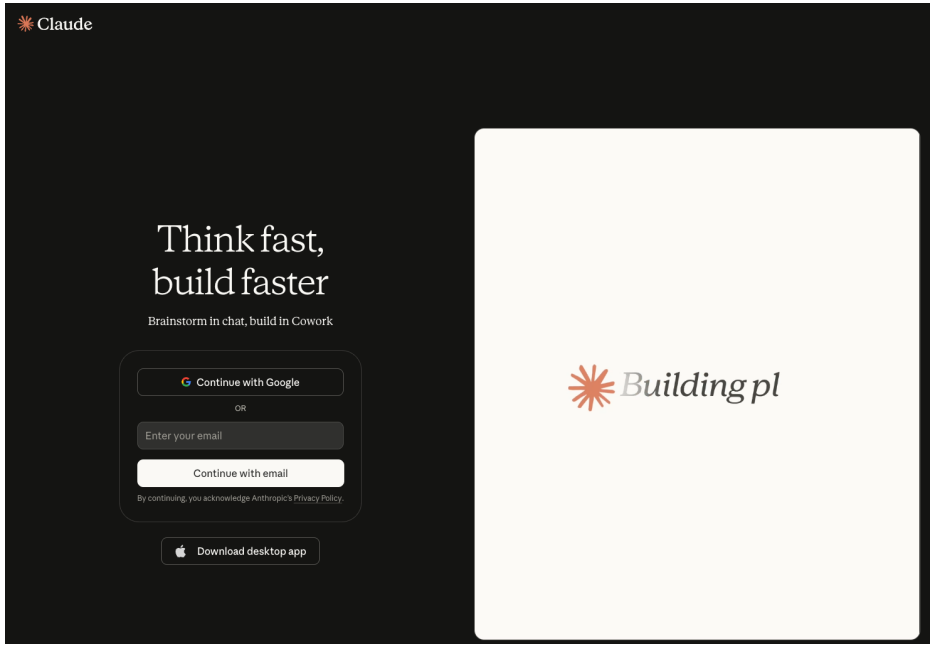

WEB 4.0

WEB INTELIGENTE

La Web 4.0, o web inteligente, busca fusionar el mundo físico y el digital. Se caracteriza por ser **proactiva, predictiva y personalizada**, utilizando la inteligencia artificial para actuar como un asistente virtual activo en lugar de una simple base de datos.

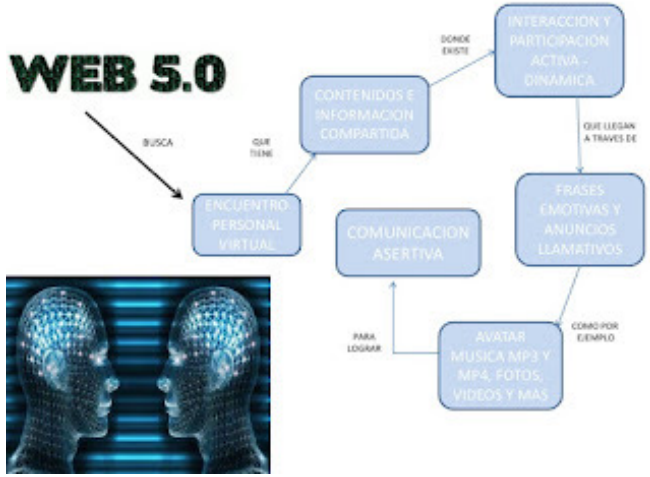

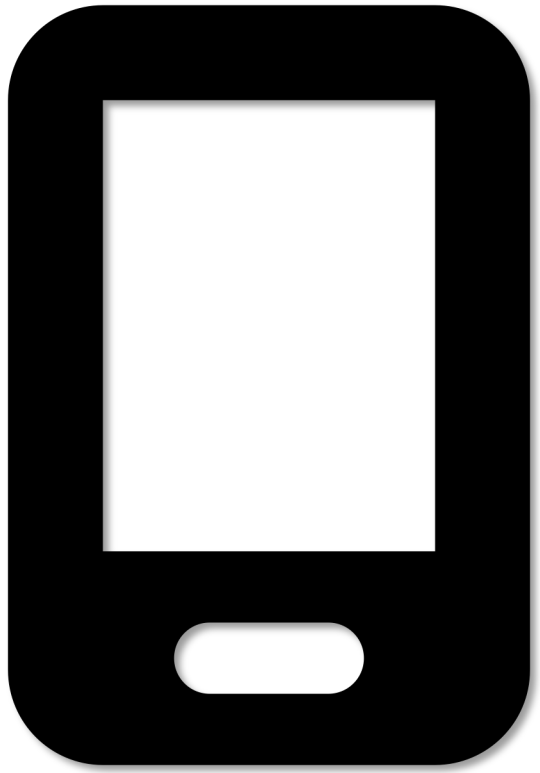

WEB 5.0

WEB SENSORIAL

La Web 5.0, o web sensorial, es la futura evolución de Internet centrada en la interacción empática y personalizada entre humanos y máquinas. Su objetivo es superar la neutralidad emocional de la web actual, haciendo que los sitios web y aplicaciones entiendan e interpreten las emociones, comportamientos y sensaciones del usuario en tiempo real.

Aplicacion cromatica psicologia, rol y uso

Wine 700 - Color principal

Valor	#ab214c
Psicologia	Sofisticacion, identidad, tradicion, confianza y experiencia premium.
Rol	Color principal de marca.
Uso	Botones principales, navegacion activa, estados seleccionados, links importantes y detalles de marca.

Wine 900 - Profundidad premium

Valor	#7a1d3e
Psicologia	Elegancia, profundidad, caracter, experiencia nocturna o de cava.
Rol	Fondo de alto impacto.
Uso	Hero sections, banners, fondos de contraste y bloques visuales destacados.

Wine 50 / Wine 100 - Soporte suave

Valor	#fdf2f4 / #fce7eb
Psicologia	Calidez, suavidad, cercania y comodidad visual.
Rol	Soporte cromatico liviano.
Uso	Fondos suaves, badges, chips, estados activos discretos, decoracion de cards y contenedores secundarios.

Blanco

Valor	#ffffff
Psicologia	Limpieza, claridad, orden y simplicidad.
Rol	Superficie principal.
Uso	Cards, formularios, contenedores, fondos internos y espacios de lectura.

Gris oscuro / texto principal

Valor	#111827
Psicologia	Seriedad, legibilidad y estructura.
Rol	Texto principal.
Uso	Titulos funcionales, nombres de vino, informacion importante y contenido de alta jerarquia.

Gris secundario

Valor	#64748b
Psicologia	Neutralidad, calma y reduccion de ruido visual.
Rol	Texto secundario.
Uso	Descripciones, ubicaciones, informacion auxiliar, labels secundarios y metadatos.

Dorado / Amber

Valor	#f59e0b
Psicologia	Calidad, seleccion, valoracion y reconocimiento.
Rol	Acento de rating o advertencia.
Uso	Estrellas, calificaciones, indicadores de calidad y estados warning.

Verde / Success

Valor	#22c55e
Psicologia	Confirmacion, exito, seguridad y naturaleza.
Rol	Estado positivo.
Uso	Confirmaciones, acciones exitosas, estados activos o validaciones correctas.

Inter UI

The user interface (UI), in the industrial design field of human–computer interaction, is the space where interactions between humans and machines occur. The goal of this interaction is to allow effective operation and control of the machine from the human end, whilst the machine simultaneously feeds back information that aids the operators' decision-making process. Examples of this broad concept of user interfaces include the interactive aspects of computer operating systems, hand tools, heavy machinery operator controls, and process controls. The design considerations applicable when creating user interfaces are related to or involve such disciplines as ergonomics and psychology.

Generally, the goal of user interface design is to produce a user interface which makes it easy (self-explanatory), efficient, and enjoyable (user-friendly) to operate a machine in the way which produces the desired result. This generally means that the operator needs to provide minimal input to achieve the desired output, and also that the machine minimizes undesired outputs to the human.
